QuickStart Services for Next-Generation Firewall

Expediting Deployment of Next-Generation Protection

When deploying new technology, you want to quickly get the most out of your security investment and protect your business. This includes minimizing risk and disruption to your business as you adopt new capabilities. You also need to ensure that your implementation follows best practices to maximize the value it provides. However, you may not have the staff or skills in-house to give you complete confidence that your security investments are protecting your organization.

Benefits

- Achieve day-one protection from sophisticated threats and attacks across the network.
- Reduce deployment risks with best practices and assistance from our experts.
- Upgrade from legacy firewalls with total confidence.
- Expedite time to value for your security investments.
- Accelerate capability adoption by adhering to best practices.
- Minimize risk through expert planning and risk mitigation at every step.

Figure 1: Delivering configuration and operational confidence for your network security investment

QuickStart Services for **Next-Generation Firewall (NGFW)** help you get the most out of your security capabilities and investments by assisting with the planning and execution of your firewall-as-a-platform implementation. We match these services with your technology capabilities to provide right-sized solutions for your business needs, offer confidence, and reduce the strain on your staff to optimize your implementation and capabilities. Knowledge transfer to your team is included, as is documentation upon completion of the engagement. The result is a well-planned and accelerated deployment of NGFW technology, adhering to best practices, to secure your enterprise.

QuickStart Services for Next-Generation Firewall Help You Achieve Faster Results

Our approach begins with a well-designed architecture and a plan for quick deployment with our QuickStart Services. We follow that up by helping your team embed the use of adopted capabilities into workflows and optimize configurations to meet your business objectives. Processes are automated where possible to increase consistency and protection for your organization.

How It Works

We execute NGFW QuickStart Services with consistency to deliver your desired outcomes, including day-one protection and capability adoption. These services are designed to be delivered remotely, but on-site engagements are available. All services include project management from Palo Alto Networks to free up your team. The steps involved in the service execution include:

- Planning and discovery, resulting in a Technical Requirements Document that will drive the rest of the engagement
- Configuration creation to meet your technical requirements
- Review and validation of the proposed implementation
- Deployment of capabilities and a cutover if applicable
- As-built documentation delivery and knowledge transfer to your team

QuickStart Services for Next-Generation Firewall include project management, planning, configuration, production deployment event support, knowledge transfer, and documentation. Our team of highly trained experts will quickly deploy your NGFW and capabilities—ensuring that your implementation adheres to best practices and provides you with total security and protection of your organization.
